COMPUTER ENGINEERING (ENGLISH)
LİSANS / MARMARA UNIVERSITY

HIGHLIGHTED PROJECTS

2019

RESTAURANT RESERVATION SYSTEM
A restaurant reservation system lets customers reserve a table while restaurateurs oversee bookings, cancellations, and no-shows. Reservation software may also offer waitlist tools, visual table management features or allow you to handle digital pre-payments.

2020

INSTAGRAM AUTOMATION APPLICATION
Automation application developed with Python (Selenium) that takes one or more words as input and collects the owners of the posts with these words

2021

WHOLESALE CLOTHING VENDOR DATABASE SYSTEM
Database system created with MSSQL for the Wholesale Clothing Store and designed with a web interface with Flask.

2022

MULTIPLE SWIFT PROJECTS
